## PROJECT

**TITLE:** Advanced Feedback Analysis

**DOMAIN:** Machine Learning

The organisation's website has an integrated feedback form where the users can write their feedback. These responses are stored in a cloud platform dynamically. The data from the cloud are extracted and generated into a CSV file and used in the analysis. This data is cleaned by preprocessing techniques. Sentiment analysis is done using a text blob and a CSV is developed along with the sentiment score. The dashboard is designed using this CSV file.
